ABSTRACT:

PURPOSE: To quickly process a petty loan with high efficiency via a cash dispenser by reading intrinsic data on a customer recorded on a card medium and then recording the data on a transaction-enable state if obtained on the card medium.

CONSTITUTION: When a customer puts a card medium 1 into a reading means 2, the data intrinsic to the customer are read by the reading means 2. Then the loan transaction data is supplied through an operation input means 3 and a deciding means 4 decides the propriety of a transaction based on said read-out data and the loan transaction data. If the transaction is possible, the data showing a transaction-enable state is recorded on the medium 1. Then the customer puts such a card medium 1 into the cash dispenser, etc. to receive a loan.
